Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2,4 are rejected under 35 U.S.C. 102(b) as being anticipated by either Ward et al. or Merriman (US 4146271, 5029943).

Ward et al. and Merriman both disclose a longwall support control comprising a central control system (22, 28), plurality of control units (20,23), mining shield control device, at least one bus line (23, see Fig. 3), code word (see col. 6 line 5+, col. 4 line 60 thru col. 5 line 5).

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1,2,4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kussel '802, Kussel '842, British document '652 and German document '698 in view of Hubner '342.

Art Unit: 3673

Kussel '802, Kussel '842, British document '652 and German document '698 all disclose the invention substantially as claimed. However, they all are silent about using an identifier to access the mining shield control device. Hubner teaches using an identifier to access a control device (see abstract). It would have been considered obvious to one of ordinary skill in the art to modify either Kussel '802 or Kussel '842 or British document '652 or German document to include the teaching of Hubner in order to prevent accidental movement of the mining structure.
